

# Do you have questions regarding the Government's Covid response?

New Zealand First will be seeking a full scale, wide ranging, independent, one year inquiry conducted publicly with local and international experts, into how the Covid pandemic was handled in New Zealand, including covering:

- » use of multiple lockdowns
- » vaccine procurement and efficacy
- » the social and economic impacts on both regional and national levels, and
- » whether the decisions made, and steps taken, were justified.

This inquiry must not be run by Parliament, nor be restricted and narrow in its scope. This must be a public and wide-ranging inquiry - so that New Zealanders will know the truth and be properly informed.

Listen to the Rt Hon Winston Peters speaking with Peter Williams regarding this policy
